

Industrial Development Corporation (IDC) Office Upgrade

Client: Industrial Development Corporation

Location: Sandton CBD

Date: October 2010

Value: R110 Million

Conversion of the IDC offices from cellular to open plan format. This 20 000 m² project called for the completion of works without any disruption to occupants during the construction period. This necessitated complex programming and logistical awareness. All floors were being stripped and refurbished to new specification. All mechanical and electrical installations were being upgraded to accommodate increased densities. Toilet areas and facilities were being enlarged and refitted.
