

Lakeview – New Maternity Ward Addition

Client: Coppermoon Trading/
Lakeview Hospital

Location: Benoni

Date: February 2014

Value: R33 Million

New maternity ward addition and renovations

The work was executed concurrently with an occupied building. A new maternity ward consisting of a 2000m² 3 level structure with a plaster, paint and tiled façade finish is the main focus. This facility caters for 70 new beds and all related services, and consulting rooms. Renovations are to a lesser degree and mainly related to integrating the existing building into the new building. A new parking area caters for additional parking. Challenges lay in the integration of existing services into new, and the co-ordination of these services through-out the construction process.
