

Letsatsi 64 MWac Solar Park

Client: Firefly Investment 261
(Pty) Ltd

Location: 40km West of
Bloemfontein

Date: October 2013

Value: R31 Million (Trencon
works only)

The overall solar farm construction project consists of a 64 MWac Photovoltaic Panel installation, covering an area of approximately 170 hectares. The site is divided into 32 blocks which is further divided into 4 quarters, each quarter consisting of 12 rows by 95 metres long. Trencon is responsible for the erection of all the lightweight metal structures and PV (Photovoltaic) panels. There is approximately 4500 tons of metal framework and 280 000 number of PV panels to be fitted constituting a production rate of 3 panels to be fitted per minute.
